

This diagram shows a cross-sectional view of a device assembly. A base structure 10 is composed of several segments: 12, 14, 16, 18, 20, 22, 24, 26, and 28. A component 30 is positioned above segments 12 and 14, featuring a vertical protrusion. A series of rectangular blocks 32 are arranged along the top surface of the base segments. A layer 34 is situated beneath these blocks, and a layer 36 is located below that. A dashed line indicates a curved surface or boundary on the left side of the assembly.

Fig. 1 is a cross-sectional view of a first embodiment of a liquid crystal display. The diagram shows a top substrate 52 with a liquid crystal layer 54 and an inorganic protective layer 56. A central electrode 48 is connected to a vertical electrode 42. A bottom substrate 40 is shown below the electrode 42. Various other components are labeled with numbers 44, 46, 50, 64, 66, and 68.
